

Rinieri's CRF and CRF X are high density spindle pruners, ideal for any variety of orchard with trees up to 13' tall. The CRF is equipped with single acting sickle bars that can handle branches up to 1.6" thick, while the CRF X's saw disc bar can take care of anything up to 3" thick. There are accessories like top and bottom bars available to make this machine adaptable to any situation. Both models also come in a "window" cutting format that can lighten the canopy ensuring the penetration of sunlight. These machines help reduce the hand labor of pruning to a minimum.

MODEL	A	Tractor Weight	Weight	Hyd. Flow
CRF 120	6.5'	4409 lbs	660 lbs	8 GPM
CRF 125	8'	4409 lbs	771 lbs	9.25 GPM
