

ARP

The ARP sub soil aerator is ideal for relieving compaction in nurseries. The unique wing design relieves hardpan and nicely prunes roots at working depths from 12-18 inches.

An optional rear cage roller and central straight spade are available.

MODEL	Work Width	Engine Power	Weight
ARP 130	48"	60-80 HP	795 lbs

IC

The Rinieri IC Fertilizer Burying Ploughs are suitable for vineyards and orchards to help mix nutrients into the ground at a working depth of 6-8 inches. This helps the granular compost not deteriorate due to external agents. There are several different IC models with differing numbers of spades and tank capacity making it a very versatile machine. There are a variety of options available such as stainless steel tanks, hydraulic opening control, front disc, and a rear roller to reduce disturbing the turf, so you can use this tool for your exact needs.

MODEL	Plow Blades	Work Width	Capacity	Weight
IC 1	1	NA	66 gal.	220 lbs
IC 2	1	NA	100 gal.	397 lbs
IC 3 S	2	35"-47"	100 gal.	463 lbs
IC 3 L	2	55"-67"	127 gal.	507 lbs
IC 4 S	2	35"-47"	132 gal.	728 lbs
IC 4 L	2	59"-71"	132 gal.	728 lbs
