

The BS 1200 is a unilateral inter-row weeder with wire rotor and automatic feeler, facilitating mechanical and ecological weeding in organic orchards and vineyards. Equipped with a 16" mower to cut and widen cover crop width, and a 16" rotary wire weeder (optional 28") controlled by a touch arm for automatic retraction control. Height adjustable rollers allow for easy gliding, maneuverability, and help flatten uncut grass. Tilt adjustment for uneven terrain and tall grass, combined with hydraulic side shift off-set allows versatile weeding in a variety of conditions.
