

The CPL Vision pre-pruner machine removes vine canes and is ideal for all varieties of vineyards. This trimmer/hedger aids in the efficient vine management and cost containment, leaving only the vines closest to support canes to clear, reducing pruning time by at least a third. All lateral movement takes place on bearings, making the frame very solid and damage resistant. This model provides excellent visibility and its inclination feature allows for use even on side slopes. Designed so the removing of shoots doesn't damage the wires, with pole bypass controlled by the operator through electrical control.

CPL Vision 1 8+8

MODEL (Standard)	A	B (min/max)	Weight	Hyd. Flow
CPL V1 4+4	12"	37"/57"	620 lbs	7-9 GPM
CPL V1 6+6	19.5"	37"/57"	640 lbs	7-9 GPM
CPL V1 8+8	27.5"	37"/57"	660 lbs	7-9 GPM
CPL V1 10+10	35"	37"/57"	680 lbs	7-9 GPM

MODEL (Compact)	A	B (min/max)	Weight	Hyd. Flow
CPL V1 6+6 G	13.5"	37"/57"	640 lbs	7-9 GPM
