

Rinieri's CRL Vision series provides a wide variety of options for your trimming and pruning needs. The CRL utilizes a sickle bar cutting system with double acting tooth and blade bars, ideal for cutting leaves and even the strongest vine shoots. The trimmers are mounted to a controlled frame with hydraulic movements that make it possible to cut any canopy design, regardless of terrain. All models are equipped with a breakaway protection system with spring return to cushion against unintended contact.

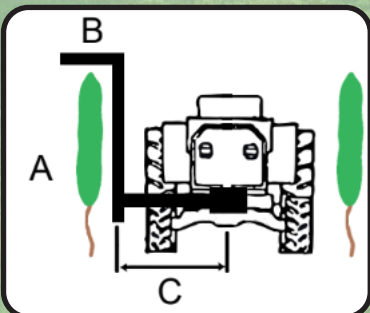

Configurations Available for a Variety of Trellis and Growing Styles. Contact BDi for full details.

Standard Manual Control

Optional Electric Joystick
(Req. Tractor w/ Cab)

MODEL	A	B	C (min/max)	Hyd. Flow
