

The machine is particularly suitable for harvesting forest fruits such as chestnuts, hazelnuts, almonds, walnuts, etc. Its small size allows it to be used with small and medium power tractors, making it easier to reach harvesting areas.

The harvested product is separated from the heavier waste material, then it is poured through a valve into a conveyor equipped with a fan, where the leaves and light impurities are eliminated by a jet of air. Subsequently, a further selection is made based on the different sizes of the fruits. Finally, the collected product will be unloaded in bags or in towed trolleys.

Min Tractor HP	Min Lift Capacity	Selector Diam.	Hose Diam.	Hose Length	LxWxH	Weight
30	881 lbs	Hazelnut - 1" Chestnut - 1.6"	4"	39'	51" x 67" x 67"	705 lbs
