

Cifarelli's low volume atomizer sprayer boasts unparalleled 53' vertical and over 59' horizontal sprays, allowing more acreage to be covered in fewer passes. Producing droplet sizes of just 90 μ , the M1200 ensures optimal plant coverage, more even distribution without the overspray commonly seen in high pressure sprayers. This results in a better quality and cleaner crop output.

M1200 Technical Specifications

Engine (Fuel)	2 Stroke (Oil + Gas)	Air Volume	754 CFMs
Engine Power	5 HP	Air Speed	235 MPH
Displacement	C7 Model, 77 CC	Weight	26 lbs (65 lbs Full)
Carburetor	Diaphragm	Length	15"
Fuel Tank	.61 Gallons	Width	18"
Chemical Tank	4.5 Gallons	Height	31"
Output	1 Gal/Min		

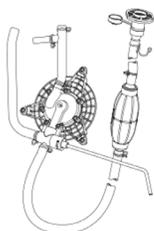

M1200 Accessories

Louver Gates Kit (3 Per Set)
OG.341.00

(1) 45° for side canopy.
(2) Wider pattern for close target.
(3) Left + right sprayer for close vertical row canopy.

Booster Pump w/ Refill
OG.340.00

Circulates the treatment for agitation, ensuring a constant flow. Refill feature allows for refilling liquid w/o removing sprayer from shoulders

Extension Tube Kit
OG.392.00

Extension application tube, 28" for tall trees. Requires Booster Pump (OG.340.00) for effective usage.

ULV Diffuser
OG.394.00

Used for more precise applications. Reduced droplet size (70 μ), kit includes 5 calibration nozzles. Booster Pump (OG.340.00) recommended.

Kit Tank for Powders
OG.346.00

For distribution of granulates/powders and sowing of seeds

Spherical Diverter OG.275.00 Double Outlet diverter for two rows
