

Cifarelli's V1200E is a vacuum for harvesting shell fruit, with a patented separation system that ejects leaves and small stones collected with the fruit into a separation tank. This tool allows the quick and effective collection of chestnuts, hazelnuts, walnuts, almonds, and acorns. A release lever allows for the emptying of the collection tank with the backpack still on.

V1200E Technical Specifications

Engine (Fuel)	2 Stroke (Oil + Gas)	Fuel Tank	.53 Gallons
Engine Power	5 HP	Size	21"x18"x33"
Hose Diameter	3"	Weight	35 lbs
Collection Tank	5.2 Gallons		

V1200E Features

- Lightweight and corrosion resistant **anodized aluminum frame**.
- Carefully designed **ergonomics** for maximum comfort.
- Padded and adjustable shoulder straps maximize comfort of **curved and padded backrest**.
- Harvesting hose controlled by **left handle** to improve efficiency.
- Built in **lever for opening and closing tank** while the machine is still on your shoulders.
- Fuel tank with **vertical nozzle** for easy refueling.
- Keep the accelerator constant with a **lockable lever**.
- Convenient **lifting handle** allows for easy transport when not on shoulders.
- Designed with **silencer and fan** for better acoustic comfort.
- Efficient system produces **very low vibrations**.
- The conveyor is made of abrasion resistant material for **internal protection** and easy replacement.
- High suction performance assured by a **super efficient fan**.
