About BDi Machinery

BDi Machinery Sales, Inc. was started in 1996 to meet specialty agricultural equipment, tool and machinery needs of fruit, vegetable, and nursery growers. Located in Macungie, Pennsylvania, 60 miles northwest of Philadelphia, we pride ourselves on being a partner to our customers and customers of our dealers, to provide them with the latest technological advances in agricultural specific equipment. We specialize in sourcing and distributing innovative agricultural equipment from around the world.

M1200

Low Volume Atomization Sprayer

Equipped with a 5HP engine and a large 4.5 gallon tank, the M1200 boasts unparalleled 53' vertical and over 59' horizontal sprays with droplet size of just 90µ.

Additional Options Available: Ultra Low Volume (ULV) System • Booster + Filling Pump
Accessory for Powders and Granulars • Louvered Ends for Veggie Crops

P35

Low Volume Atomization Sprayer

The P35 is just the right size for small acre or start up growers, offering the features of a full sized sprayer in a compact flexible format. The Cifarelli blower produces 235 MPH air flow, with droplet range of 100-150µ. The CIMA fan-tail spray head is ideal for close dense crops, with an adjustable angle to best target different crop heights. The 30-gallon tank is just the right size to cover about one acre per fill up. The frame has a base that can sit on the back of a gator or golf cart, or attach to a 3 point hitch.

Wheel Kit Available

2 Step Calibration Made Simple: Teejet Quick Change Orifice & Pressure Regulator for Fine Tune Adjustment

SPRAY BOOM & CONE

The herbicide boom sprayer with rubber dome has a 110° nozzle which equals 24" spray. The off-center spray tip at 12" is also available.

PH60

The PH 60 is a versatile 12 volt, 3 point hitch, herbicide sprayer. Adjustable spray booms with tilt control and a separate wand nozzle allows for flexible spraying. This unit will adapt to any area and has easy access controls.

Separate Stainless Steel Boom & Cone Assembly Available

See Video Demonstrations on our Website and YouTube

LOW VOLUME AIR SPRAYERS

The CIMA Advantage

CIMA has developed a delivery system that is able to treat more canopy with less water. Their simple transmission requires less maintenance with a fan that absorbs less HP than a conventional air-blast sprayer. All CIMA sprayers can be fitted with a variety of custom spray heads to target the treatment into the canopy with minimal over-spray.

High Volume Sprayer

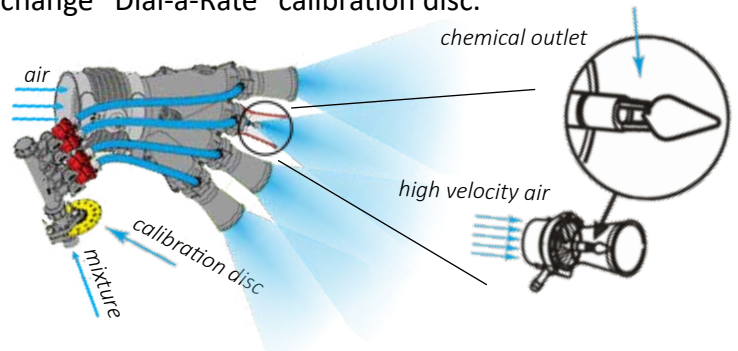

Low Volume CIMA Sprayer

CIMA's Low Volume sprayers create droplets of 100-150 μ , while standard high pressure sprayers commonly make droplets of 250-400 μ . Breaking down the liquid into smaller droplets allows for better coverage, more even distribution, and allows appropriate application without soaking your crop. The low volume system coats all surfaces of the system with air speeds around 170-200 MPH, achieving maximum coverage and a cleaner crop.

All CIMA spray heads can be easily adjusted to direct the spray into the crop with minimal over spray. Each spray outlet uses a specially designed no tip nozzle to produce the smaller droplet size. Calibration is easy and takes only seconds, as all spray heads use the CIMA quick change "Dial-a-Rate" calibration disc.

cima 3 Point Sprayers

Low Volume Atomization Sprayers

CIMA's featured ergonomic design makes it possible to use a smaller versatile tractor. Choice of a variety of target heads to treat any canopy. All models come standard with internal mixing basket and a safety fresh water tank. Calibration is easy and quick with "Dial-a-Rate" and target control head. Air shear delivery system allows minimal active chemical usage to achieve great coverage.

P45 w/ 5x5

Up To 165 Gallons!

Model	Tank (gal)	HP	Weight (lbs)	Controls
P42	80	20	429	Manual

Sprayer selection based on acreage & tractor specifications • Spray head selected separately based on application

cima Trailer Sprayers

Low Volume Atomization Sprayers

CIMA's trailer sprayers range from 200-525 gallons and have a spray head available for virtually any crop. Low volume atomization delivery system will treat more canopy with 2/3 less water than conventional high-pressure sprayers. Low pressure also means low maintenance.

T55 w/ 2M4C

Model	Tank (gal)	HP	Weight (lbs)
T45	200	35	837

Sprayer selection based on acreage & tractor specifications • Spray head selected separately based on application

DISTRIBUTION HEADS

CIMA Heads

CIMA offers a wide range of interchangeable spray heads designed to deliver optimal coverage. Adjustable air volume and directional features ensure excellent penetration and treatment of any canopy. The combination of targeted spray and anti-drip technology means minimal over-spray and less wasted chemical, which is friendlier to the environment.

*All CIMA Heads are not listed in this catalog.
Visit our website to see a full list of available spray heads.*

Individual shut off valves + easy calibration!

All Purpose

4x4

Available for all sprayers

Ideal for:

- Cacao trees
- Pomegranates
- Protea
- Table-grapes
- Vineyards
- Other Crops

5x5

Available for all sprayers

Ideal for:

- Cacao trees
- Pomegranates
- Protea
- Table-grapes
- Vineyards
- Other Crops

T.2V3 T.2V4

Available for all sprayers

Ideal for:

- Almond Trees
- Apple
- Apricot
- Cherry
- Hop Plant
- Peach
- Pear Trees
- Pomegranate
- Vineyard
- Plums
- Variety of Other Crops
- Narrow Rows

Row Crop

PM

Available for P55, T55, S55

Ideal for:

- Tomato
- Onion
- Blueberry
- Other Row Crops

PT

Available for P55

Ideal for:

- Potato
- Melon
- Blueberry
- Other Row Crops

Tower

CIMA's tower spray heads are designed for a targeted approach for disease and pest control, even with tall canopies. Spray nozzles can be adjusted for application on various height crops or sloped terrain.

TC.4M4C

- Ideal for:**
- Vineyards
 - Other Crops

Available for P/S/T (45/50/55)

T.6M2D (Narrow)

- Ideal for:**
- Raspberry Bushes
 - Vineyards
 - Narrow Rows
 - Other Crops

Available for P42, P/S/T45

TC.2M2M

- Ideal for:**
- Apples
 - Pears
 - Tomato
 - Vineyard
 - Other Crops

Available for P/S/T (45/50/55)

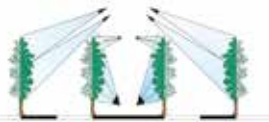

Optional Electro Hydraulic Control

TC.2M4C

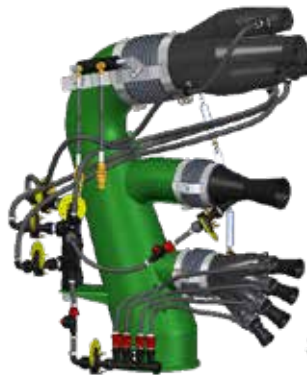

- Ideal for:**
- Blueberry
 - Melon
 - Vineyard
 - Windy Areas
 - Other Crops

Available for P/S/T (45/50/55)

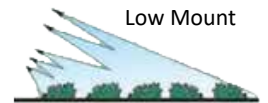

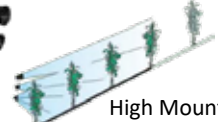

T.GC (Row Cannon)

- Ideal for:**
- Asparagus
 - Tree Nurseries
 - Vegetables
 - Tobacco
 - Blueberry
 - Variety of Other Crops

Available for P42/45/50/55, T45/50/55

Orchard

T.OL

Available for P42/45/50/55

T.20L

Available for P50/55, T50/55, S50/55

T.4C20L

Available for P55, T55, S55

T.40L

Available for T55

DISTRIBUTION HEADS

cima

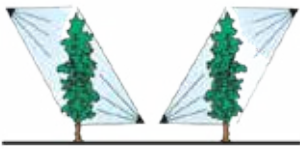

Multi-Row

CIMA makes several on target multi-row distribution heads for your needs. Simply match up your specific growing conditions to the configurations below to find the ideal spray head for your needs.

TCF.2M2M (GREEN HUG)

Available for P/S/T50

Hydraulic Folding Arms for Row Spacing of 7'-10'

Ideal for:

- Berries
- Vineyard
- Tunnels
- Windy Areas
- Other Crops

TCI.4M4C

Available for T50/55

SYNERGY

Available for S55

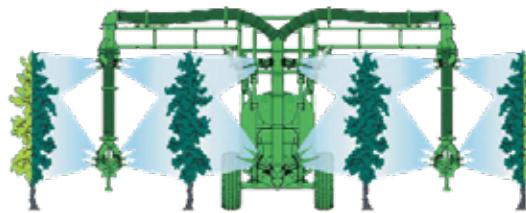

Hydraulic Movement and Optional Electric Actuators for Cannons

Ideal for:

- Blueberry
- Vineyard
- Tomato
- Windy Areas
- Other Crops

TS5.6M6C (Wrap-A-Round Boom)

Available for T50/55

Hydraulically Controlled, Optional Electric Hydraulic Controls

Ideal for:

- Blueberry
- Vineyard
- Tomato
- Windy Areas
- Other Crops

cima

Air Boom

CIMA air booms are designed for low bed row crops. Booms are fully customizable with options including tank size, nozzles per bed, boom width, and number of outlets per nozzle. Call BDi for full details.

BM 8/10

Available for P42/45/50

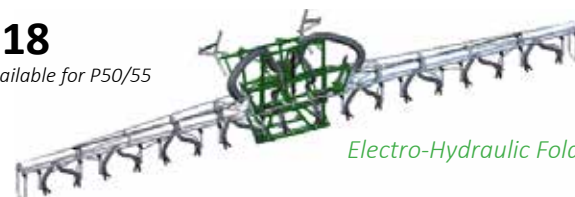

Manual Fold

B18

Available for P50/55

Electro-Hydraulic Fold

Ideal for:

- Berries
- Artichoke
- Potato
- Tomato
- Vegetables
- Other Crops

Pruning Shears

Electrocoup F3020

The F3020 electric pruning shears have used 6 years of research, tests and fine tuning to present a worthy heir to the 3015. It features a lighter, more compact and easier to handle design while delivering higher cutting speeds and improved work comfort.

**Ultra-Compact
Lithium-Ion Battery!**

Electric Sharpener

Sharpen your blades in record time! Thanks to its 3-pad connection, the A48V3 electric sharpener is compatible with batteries of all Electrocoup models (F3005, F3010, F3015, F3020).

Tying Machine

AT1000

INFACO's professional electric tying tool, the AT1000, is reliable and fast, making tying tasks effortless. Versatile, it accommodates various types of ties in viticulture. Its unique grip is identical to that of the F3020. It's now a true duo, from pruning to tying, that supports vine growers and orchard keepers in maintaining their farms. The AT1000 is 100% automatic. With formidable efficiency, its ease of setup and operation are among its many advantages.

Pruner and Tying Machine Bundle Available! Call for more information!

PRUNERS + ACCESSORIES

Pneumatic Shears

Lisam pneumatic shears are made with magnesium alloy casting, allowing the operator to use them even at low temperatures without any power variations. Extension poles are available to reach higher branches.

SLY

The lightweight and comfortable option for any farmer. Its high-performance piston and alloy construction allows for powerful and precise cuts at any temperature.

Cutting Capacity: 1.25"
Working Pressure: 150 PSI
Net Weight: 1.21 lbs
Air Usage: 3 CFM

SANA SLY

A unique pneumatic scissor with a blade that is disinfected after each cut. Designed to respond to the need of farmers to avoid disease transmission between trees during pruning season.

Cutting Capacity: 1.25"
Working Pressure: 150 PSI
Net Weight: 1.21 lbs
Air Usage: 3 CFM

SUPER SLY

Some trees are harder to prune than others, and this shear is designed with that in mind. Created specifically for citrus, olive, and other hardwood trees, the Super SLY is up for any job.

Cutting Capacity: 1.625"
Working Pressure: 150 PSI
Net Weight: 1.76 lbs
Air Usage: 3.5 CFM

Telescopic Extension Pole

VINEYARD DELEAFERS

Olimi's line of pneumatic vineyard deleafers allow optimal development of the grapes, increasing their quality and the overall health of the vine. Utilizing air flow does not damage the bunches during any period of growth. Deleafing improves the penetration of pesticides, increases aeration and prevents fermenting, and facilitates manual harvesting.

Tractor Requirements:

- 50 Horsepower
- 540 RPM PTO Rotation
- 400F Weight: 926 lbs
- 400R Weight: 882 lbs

Tractor Requirements:

- 50 Horsepower
- 540 RPM PTO Rotation
- 430F Weight: 1,058 lbs
- 430R Weight: 1,036 lbs

Tractor Requirements:

- 80 Horsepower
- 750/1000 RPM PTO Rotation
- 470F Weight: 1,366 lbs
- 470R Weight: 1,764 lbs

ORCHARD DELEAFERS

Olimi's orchard line has been specifically designed to ensure the effective and targeted leaf removal from the trees, allowing selective elimination of leaves without risk of damaging the fruit. The removal of excess leaves results in a higher quality final product and higher value of harvested apples due to better coloring.

566F

Orchard Pruners

CRF

High density orchard pruner suitable for a variety of trees including apple, apricot, cherry, and olive up to 13 feet tall. The sickle bar with SCH teeth can cut branches up to 1.6" thick. A number of accessories are available to adapt to your needs, including hydraulic tilting and rear rotation, as well as a "window" cutting kit that allows sunlight to penetrate the canopy and reduces hand labor during pruning.

ORP

Orchard pruner suitable for several types of cultivation including cone, mono-cone, or high density for machine harvesting. The frame has 4 hydraulic movements controlled by joystick. Can be used with 1 or 2 saw disc bars, for the option to cut the side and top at the same time. Discs can handle branches up to 4" thick.

ORSX

The Orchard Pruner ORSX with Discs is a versatile machine designed for efficient pruning in orchards. It features a proportional distributor (4+1), hydraulic lifting (4.75 feet), and a hydraulic tilting column for easy operation. The parallelogram system on the second arm ensures precise cutting, while the hydraulic tilting cutting bar and manual position adjustment provide further flexibility. Equipped with 23.5-inch disc bars, an anti-cavitation valve for motors, and a hydraulic stand for storage. It also includes a hydraulic kit with an 21 gal/min pump, 23.7-gallon oil tank, gearbox, oil cooler, and cardan joint, as well as a 12V socket for convenience.

BRM

Hedge trimmer with cutting bar (47", 59", or 79") for pruning branches up to 1.2" thick. Reversible frame performs perfect cuts on both sides of the tractor. Can be used with small tractors, 25 HP minimum.

BRE

Hedge trimmer/bush cutter for use with mini-loaders and front loaders. Frame with cutter bar (47", 59", or 79") for pruning branches up to 1.2" thick. Joystick controlled for easy use and precision on any cutting geometry.

Orchard Pruners

CRB-X

Orchard Pruner for skirting cuts on citrus and traditional orchard trees. Available with single or double saw disc bars which can handle branches up to 4" thick. Comes equipped with a spring safety joint to avoid damaging the plants.

Bush Pruner

CRV-X Tower 1 Plus U

Blueberry bush pruner with saw disc cutting bars. Heavy duty central column supports hydraulic lifting and tilting, as well as side shift. The U shape allows for pruning on both sides of the bush with one pass.

Drag Mower

Interpique

Drag mower with mechanical driven swing arm that can be used to mow around trees, posts, and other barriers without any damage. Comes in a single or a double mower head format. Mower is direct PTO driven at 540 RPM with hydraulic tension control to adjust depth of swing. Each 3 blade disc mower head has a 47" cutting diameter with an adjustable height rear wheel. Each arm has a 10' outreach, so maximum cutting distance is 20' with the double.

Cultivators

Bio Dynamic

The Bio-Dynamic product line is designed for fast weeding in vineyards and orchards with working speed up to 9 MPH. The two main components of the machine are the Bio-Disc, which tills the soil and moves it towards the plants, and the Bio-Star, whose fingers work the soil between the plants. The Bio-Star is available in different sizes and consistencies for your specific needs.

SRL Sucker Remover

Available in Duo Format

RSI 65 In and Out Mowing Wheel

EL In-Row Cultivator

The original in-row power harrow for vineyards and orchards is the result of 30 years of development. Thanks to its tilting working head, the EL can work in difficult conditions and on hillsides. This cultivator removes grass from the ground and does not make any tillage pan. Attached by 3 point hitch and PTO shaft driven with a hydraulic pump that controls the touch bar. Counter-rotating vertical tines ensure optimal cultivating while keeping the soil level and avoids hard-pan. Ideal for stony conditions and can handle tall weeds.

EL 140

AI 15

Fixed front plow with an in-and-out rear plow allows for de-hilling and root pruning for vineyards and similar crops. Attached 3 point linkage with independent hydraulic distributor. Additional furrows can be added in order to increase the working width and row ridging. Optional plow faces opposite direction for hilling up toward the vine. Suitable for all types of soil. PTO shaft driven.

In/Out Blade

Protect from winter freeze using hill up option!

Hill Up Plow

Cultivators

Turbo

The Turbo with hoeing blade avoids plants by 90° rotation of the tool, allowing working speeds of up to 6 MPH in good conditions. It is equipped with a trolley with adjustable wheels and front furrow opening disc, allowing for ecological weeding control, even when plantings are very close together.

Available in Duo Format

Turbo PRT

Inter-row rotary tiller with Turbo PRT tool holder for orchards and vineyards designed to eliminate weeds and manage the soil under the row without damaging the plant. The working head is composed of two rotors with vertical axes that work optimally in loose or soft soil. Other tools can be mounted such as a wire suckering head, weeding blade, disc cutter, mini shredder, lawnmower, rotary harrow.

*One Machine,
7 Tool Options!*

Turbo Evo

The Turbo Evo tool is supplied with both a front and rear mount frame and comes equipped with hydraulic reservoir and adjustable gauge wheels. This versatile tool can use a variety of attachments: power harrow, mini shredder, hoeing discs, Turbo hoeing blade, sucker remover, cultivator disc, and plow.

Power Harrow

Shredder

Hoeing Disc

Rotary Mower

Turbo Blade

Sucker Remover

Cultivator

*One Machine,
7 Tool Options!*

Sweeper

AN1 & AN2

Sweeper with nylon whips for vineyards and orchards. It is available with single or double front mounting frame or with a connection to be mounted on a shredding mower in order to do two working steps at the same time.

Florix

Flower Thinning Machine

FLOWER THINNING MACHINE FLORIX, presented by Agrox and Rinieri, with a patented system that revolutionises fruit thinning for all species requiring treatment (apples, stone fruit, etc.) combining effectiveness, innovation and sustainability. An operation that requires precision, uniformity, delicacy and that Florix performs with great ease of use, mobility and modular speed.

The machine is the most valid alternative to the use of chemical products and is irreplaceable in organic cultivation. Florix guarantees full efficiency, maximum modularity and adaptability and rapid return on investment. It is a patented flower thinning system that respects plants and the environment.

Mulcher

Biosystem RMB 1200

Compact and robust machine designed for grass cutting and mechanical/ecological weeding in organic orchards and vineyards. Featuring a low profile and counterclockwise rotating rotor with reinforced wires, it efficiently distributes cut grass. The mulcher includes an electro-hydraulic automatic feeler for precise adjustments, hydraulic tilt for the rotor, and height-adjustable rollers for smooth maneuverability. With a hydraulic side shift, self-lubricating frame, and PTO gearbox (540 RPM), it adapts easily to uneven terrain. Mounted behind the tractor, it offers flexible mounting options, with CE certification and safety protections.

Spader

005/105/205 Series

Ideal for use in horticulture, vineyards, orchards, etc., they allow to till the soil with reduced power absorption and fuel consumption.

Variable range from machines for hobbyists to professional solutions for contractors and large companies.

005 Series

105 Series

205 Series

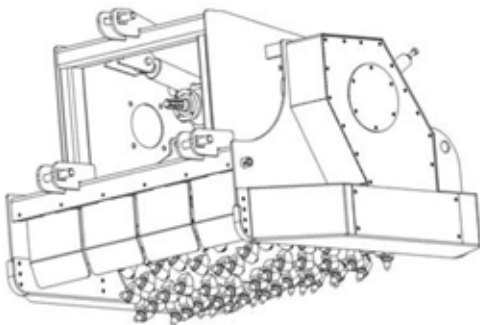

Crusher

CR-120-S

The CR-120-S is designed to crush stones, rocks, and stumps at a working depth of 4" to 8". It can be used for preparing land for vineyards, orchards, and crop sowing; preparing fire lanes; maintenance of dirt roads; stabilizing soil; and a variety of other applications. All wearing parts are made of Hardox and are replaceable individually, and every model is equipped with a rear grate that is hydraulically adjustable from the tractor. Working width of 47".

MIDDLES MANAGEMENT

Stone & Sod Burier

SA & SB

The SA and SB tillage machines are designed for working in stony soils and for preparing sowed middles for replanting. This tillage machine does primary, secondary, and finishes tillage in one pass. Options for roller, seed-box, or bed-former available. Your vineyard will have a finished look and level rows making for easy travel during regular operations.

Series SB

Power Harrows

Power Harrows are the preferred tillage tools to work the soil deeply while keeping the top soil on top. An optional rear roller can smash missed clods to leave a fine seedbed. Used in conjunction with spaders these tools can do all your mechanical tillage and soil cultivation to preserve lifespan and structure.

Alfa, Sirio, Beta, Omega, and Gamma Series available for a variety of different needs.

Alfa Series

Inter-Row Tillage

FRP Tandem Discs

Tandem mounted 20" disc harrows, perfect for work between rows. Very strong machines with four-disc groups to ensure optimal soil leveling.

Widths available from 71" to 102"

ARP Ripper

The ARP is ideal for relieving compaction in nurseries. The unique wing design relieves hard-pan and nicely prunes roots. Optional roller and spader available.

Width: 51"

FRM Disc Harrows

Disc harrow model with 24" cutting discs, equipped with anti-shock springs. Adjustable width and vertical hydraulic lift allow for easier movements. Rear roller has working depths from 3"-6". Models available with 8, 10, 12, 16, or 20 discs.

Widths available from 45" to 112"

CM Deep Tine Cultivator

Cultivator equipped with anti-shock springs. Adjustable width and vertical hydraulic lift allow for easier movements. Rear roller has working depths from 6" to 10". Optional cage roller or lime & fertilizer drop box available.

Widths available from 43" to 92"

Shredders

TRC

TRF

TRD, TRF + TRC

The TRD is ideal for cutting grass and wood up to 3/4". Its sharp tools perform a clean and regular mowing.

The TRF is suitable for mid-size prunings up to 2". 2.75 lb hammers or Y flails available.

The TRC is an all-purpose tool for grass, corn, and wood pruning up to 2 1/4". Features an openable rear cover for dispersion of waste materials.

Working widths available from 33" to 89"

TRL + TRL-B + TRR1

The TRL is also a hammer action shredder suitable for branches up to 3". Rotor mounted on oscillating dual race ball that is fully protected from water and foreign bodies. TRL-B is a low profile model that has a lowered transmission flank allowing it to pass under trees without damaging the fruits.

TRL-B

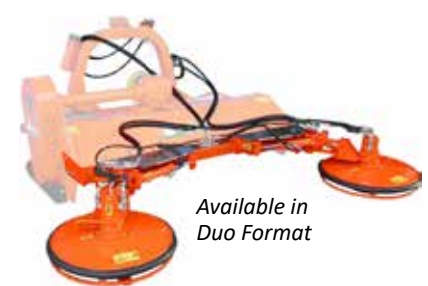

TRR1

The TRR1 Reversible Shredder is ideal to collect and shred prunings up to 3". Featuring hydraulic movement with pick up inversion, double body with triple counter knives, adjustable pivoting rear wheels, cardan joint and free wheel gearbox, this machine is durable and versatile.

TRH models working widths 57"-77"/TRL models working widths 49"-79"

RSI 65

The RSI inter-row mower wheel with crossbar support for shredder installation and joint with spring for in and out movement, 25.5" diameter.

Available in Duo Format

Applicable to TRU, TRL, TRP models for vineyards and orchards.

Mower/Cutter

BRF

The BRF mower/bush cutter arm is suitable for pruning grass or small branches up to .8". The extendable arm is ideal for cleaning ditches, roadsides, gardens, or sloping banks.

Cutting widths available from 20" to 35"

TREE DIGGERS

HOLMAC

Tree Diggers

Holmac tree diggers are a line of compact machines that allow you to operate in tight row and plant spacing. The turning blades allow you to dig out trees where other machines can't fit. This line provides great solutions for high density growers. Holmacs allow for faster approach, faster digging, and faster bag & basket time, leading to the ability to dig 2 1/2 trees in the same time it takes other brands to dig 1.

Standard Features on All Models:

- 3 Separate Pump Actions
- Vertical Tip Back Blade to lift the root ball
- Horizontal Blade Turn aids in quicker time to bag
- Adjustable Rubber Tracks (Move simultaneously for less stress)
- Blade Vibrations at 4,000 per minute for smoother operation
- Forward and Reverse speeds of 0 to 4 MPH
- Independent turn levers
- Roll Over Protection (ROP) & Seat Belt

HOLMAC

Tree Binder

The Treebinder is a machine designed and patented to facilitate the packing of the plant on site before suckering. This operation saves time and personnel, but also makes better use of the space available for transporting the plants in lorries or containers. Can bind trees up to 23.5 feet.

CIFARELLI

V1200E

The Cifarelli V1200E is a vacuum harvester that is used to collect quickly and effectively chestnuts, hazelnuts, walnuts, almonds, and acorns. This machine separates the product from leaves or other debris sucked in which are expelled through the air exit. Emptying the tank is simple with the machine on the shoulders pressing the proper level. To speed up collecting the harvest we recommend using the BL1200 blower or the air exit pipe of the vacuum itself to gather the product first.

Collection

K530 Harvester

Vacuum harvester for all nut varieties, particularly effective for olives, hazelnuts, and chestnuts. The 33 foot hose grants a wide range to aid in efficient harvesting. Its compact size allows for use with small and medium sized tractors, making it more portable to reach a wider variety of collection areas.

EU 1000/2000

These models are particularly suitable for harvesting forest fruits such as chestnuts, hazelnuts, almonds, walnuts, etc. Their small size allows them to be used with small and medium power tractors, reaching harvesting areas easily. The harvested product is separated from the heavier waste material, poured through a valve onto a conveyor equipped with a fan, where impurities are eliminated by a jet of air.

EU1000

S98/120 Cleaner Separator

This model is designed for the fast and accurate separations of all varieties of nuts from any sticks, leaves, stones or other debris collected during harvest. Works well in conjunction with any of Chianchia's harvesters. The machine is able to handle 2,600 lbs of nuts per hour, increasing the efficiency of the collection process.

CHIANCHIA Sorting/Shelling

P80 Super Electric Sheller

Machine comes with a roller system designed to sort shelled fruit by size. Suitable for shelling large batches of nuts, particularly hazelnuts. Has hourly capacity of 55 lbs per hour.

P250/300 Electric Sheller w/ Load Conveyor

Machines for shelling nuts with striking plate shelling system. Loading carried out by a conveyor with speed regulation. Sorted through a half-lunate and half-perforated roller system. Can process between 130 and 155 lbs per hour.

P300

Drying

Solar 2000

The Chianchia Solar 2000 is suitable for the simple and economical drying of forest fruits in shells such as hazelnuts, chestnuts, almonds, walnuts, pistachios, etc. With the addition of accessories, it can be used for drying organic cereals. Its small size and low height allow it to be used in particularly narrow spaces with reduced consumption.
