

The Rinieri DRF is a double barrel leaf remover that fits the needs of modern vineyards. The machine removes leaves from the grape zone, increasing maturation and aeration, reducing the amount of chemicals sprayed. It consists in two opposite rollers, one with holes and the other with rubber, and a stainless steel protection shield which follows the vines wall, allowing precise and safe removal of leaves without damaging the grapes. Aspiration is provided by a fan equipped with hydraulic motor. Roller is 19" tall.

The DRF can be ordered on Vision 1 or 2 frame, or as an add-on for the Tower, CRV, and CRL frames.

Optional Front Cutting Bar Available

MODEL	Row Width (Min/Max)	A (Min/Max)	Weight	Hydraulic Flow
DRF Vision 1	4' - 6.5'	23" - 43"	562 lbs	8 - 10.5 GPM
