

Lisam pneumatic shears are produced in magnesium alloy casting to allow the operator to use the shears with no power variations even in low temperatures. All models can be fitted to extension poles to reach higher branches.

SLY

Lightweight and easy to use pneumatic shears for pruning fruit trees. Equipped with a high-performance piston that avoids kickback on the wrist.

SUPER SLY

Heavy duty pruning shears built to easily prune hardwoods like olive and citrus trees that require a lot of attention during pruning season.

SANA SLY

Pruning shears specially designed to sanitize between each cut, controlling the transmission of disease.

SLY DT

Pruning shears equipped with double edged blades, allowing for the most clean and precise cuts possible, leaving no residue and promoting branch healing.

4 WIN

Shears created for maintenance of vineyards, carefully and effectively pruning vines. Lightweight, functional, and comfortable tool for the operator.
