

CR-120-S

The CR-120-S is designed to crush stones, rocks, and stumps. It can be used for preparing land for vineyards, orchards, and crop sowing; preparing fire lanes; maintenance of dirt roads; stabilizing soil; and a variety of other applications. All wearing parts are made of Hardox and are replaceable individually, and every model is equipped with a rear grate that is hydraulically adjustable from the tractor. Working width of 47".

MODEL	Engine HP	PTO RPM	Weight	Working Depth
CR-120-S	90/100	540	2866 lbs	4"-8"
