

With the Treedigger HZC 40 you can dig out trees with rootballs from 16" to 55" of diameter. With the vertical lifting system you can lift the tree with its rootball out of the soil completely holding the tree in the vertical position. Comparing to the previous HZC 38, we are giving more attention to the worker, insulating totally the driverseat. (Optional Crane Available)

18" Vertical Lift

|                     |           |
|---------------------|-----------|
| Rootball Dimensions | 16" - 55" |
| HP                  | 50        |
| Weight (w/ blade)   | 5,225 lbs |
| Tracks              | Rubber    |
| First Speed         | 2.5 MPH   |
| Second Speed        | 4.3 MPH   |
