

Rinieri's CRV Vision series provides a wide variety of options for your trimming needs. The CRV has cutting bars with stainless steel rotating knives that are strong and lightweight, allowing fast precision cuts of vine shoots. These machines can operate at over 9 MPH due to their blades rotating at 3000 RPM. The cutting bars are equipped with aluminum pulley transmission and toothed belts, reducing weight and improving performance. Trimmers are mounted to a controlled frame with hydraulic movements that allow the cutting of any shape canopy. All models are equipped with a breakaway protection system with spring return to cushion unintended contact.

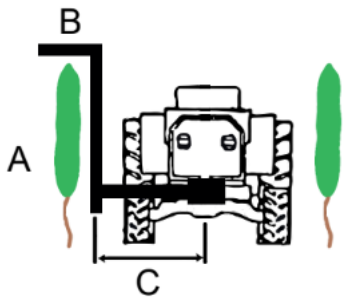

Configurations Available for a Variety of Trellis and Growing Styles. Contact BDi for full details.

Standard Manual Control

Optional Electric Joystick
(Req. Tractor w/ Cab)

MODEL	A	B	C (min/max)	Hyd. Flow
CRV VI 3+2	41"	29"	28"/47"	8 GPM
