

Infaco's unique dedicated olive harvester harvests 3 times faster compared to hand harvesting. The head features Infaco's patented elliptical movement and carbon fingers that reduce damage to the plant and reduces the alternate bearing phenomenon. The elliptical movement ensures that olives fall directly down into nets instead of being flung far away making harvest easier, faster, and decreasing waste.

LENGTH OPTIONS

E50048T	7' 6" - 10' 10"	TELESCOPIC FIXED
E50048	7' 3"	

COMPATIBLE BATTERIES
