

The P35 is just the right size for small acre or start up growers, offering the features of a full sized sprayer in a compact flexible format. The Husqvarna blower produces 220 MPH air flow, with droplet range of 100-150 μ , allowing for better crop coverage than a high pressure sprayer. The CIMA fan-tail spray head is ideal for close dense crops, with an adjustable angle to best target different crop heights. The 30-gallon tank is just the right size to cover about one acre per fill up. The 12V pump supplies liquid to the spray head and agitates the mixture in the tank. The frame has a base that can sit on the back of a gator or golf cart, or attach to a 3 point hitch.

2 Step Calibration Made Simple: Teejet Quick Change Orifice & Pressure Regulator for Fine Tune Adjustment

P35 Technical Specifications

Engine (Fuel)	2 Stroke (Oil + Gas)
Engine Power	4.6 HP
Carberetor	Diaphragm
Fuel Tank	.68 Gallons
Air Volume	1000 CFMs
Air Speed	220 MPH
Liquid Tank	30 Gal.
Dual Pump 12V	12.5 GPM
Dual Agitation	Jet/Bypass
Size	36"x34"x36"
Weight	125 lbs

P35 Wheel Kit

Bolts onto the standard frame to pull behind tractors, ATVs, UTVs, and other small utility vehicles
